

VIRAL

Varieties of Industrial Relations in Aviation Lockdown

Turbulence: The e-Newsletter of the VIRAL Project

Coordinator's Corner

Dear Reader,

Welcome to the first issue of "Turbulence," the e-newsletter covering the EU Commission-funded research project Varieties of Industrial Relations in Aviation Lockdown or "VIRAL." The purpose of this newsletter is to keep the general public up-to-date on our activities, as aviation and air transport affect us all in significant ways.

The goal of VIRAL is to understand how the air transport sector was impacted by, and responded to, the COVID-19 pandemic. Ultimately the project aims to provide crucial advice to policymakers and social partners around best practices for relaunching this important part of our economy.

To accomplish this, we are taking a transnational approach to the work, [pulling together a core team](#) of researchers from 12 universities, research centers and social partners to examine the impact of the COVID-19 Pandemic on aviation in 7 EU countries (Denmark, France, Germany, Ireland, Italy, Spain and Poland).

In addition to the comparative nature of this project, VIRAL is unique because it considers:

- 1.) the *entire* air transport value chain, and not just a segment, like airlines or airport management, and
- 2.) the different ways in which the *industrial relations systems* in each country responded to the crisis.

Please feel free to [sign-up](#) to automatically receive this newsletter in the future. And of course, please visit our [website](#).

Fasten your seatbelts, as we are about to take off!

Best,

Fausta Guarriello
Professor, Department of Legal and Social Sciences, VIRAL Project Coordinator
Università degli Studi "G. d'Annunzio" Chieti - Pescara

Project Updates

Grounded: Aviation in Freefall
On the eve of the first lockdown, the air transport sector was coming off a decade of continuous growth.
